

Eastern Sierra Chapter Event

Tuesday, June 28, 2011

ElectraTherm, Inc.
4750 Turbo Circle, Reno

“Converting Heat to Power: ElectraTherm’s Innovative Technology”

Celeste Dodge (Corporate Communications Manager) and Andrew Oxner (Engineer)
ElectraTherm, Inc.

Recently, President Obama spoke at the ElectraTherm facility in Reno and recognized the company for its innovation to help solve our nation’s energy needs. ElectraTherm’s “Green Machine” recovers heat from low-temperature sources and converts this to electrical energy with zero emissions and no fuel consumption. How can electrical energy be produced from heat sources below 212 °F? What is an “expander”? Which industrial processes and natural sources can be used? Are government incentive funds available? Are Greenhouse Gas emission credits available? What is the payback? How is ElectraTherm using its grant from the Department of Energy?

Members and colleagues are welcome to join us for all of this, and more!

4:15 to 4:45 - Registration, hors d'oeuvres, and Networking

4:45 to 5:30 - Presentation

5:30 to 6:00 - Green Machine Demonstration followed by Q&A

A&WMA Members - \$10
Future A&WMA Members - \$12
Fulltime Students - \$5

Attendance is very limited. RSVP by Friday, June 24. For additional information or to RSVP, contact Fred Cooper at (775) 746-0905 or fred.i.cooper@sbcglobal.net. Remember to visit the Eastern Sierra Chapter website (www.awma-easternsierra.org) for the latest news and events.
